

Sari Owaid Alsulami

Data Analyst & AI Engineer

Saudi Arabia | sarialsulami@gmail.com | +966 54 934 4220 | [linkedin.com/in/sari-alsulami](https://www.linkedin.com/in/sari-alsulami) | github.com/Mr-Sari

SUMMARY

Data Analyst and **AI Engineer** specializing in **Machine Learning**, **NLP**, and **LLMs**. Experienced in building **AI solutions**, **RAG pipelines**, and **analytics platforms** that turn data into insights. Strong background in **data engineering**, **automation**, and **decision systems** in government and enterprise environments.

EXPERIENCE

Holy Makkah Municipality (via Al-Khaleej Company) – Makkah, Saudi Arabia <i>Data Analyst</i>	12/2025 – Present
- Built “Maarefah Plus” platform using Python, SQLite, and full-stack web technologies, enabling centralized knowledge access and improving cross-team collaboration. Utilized Toad and SQL to build database views and optimize queries for data extraction, analysis, and Power BI. - Contributed to Digital Transformation Measurement to improve digital maturity, efficiency, and productivity. - Designed 10+ Power BI dashboards tracking 25+ KPIs, automating reporting and reducing manual effort.	
Saudi Ground Services (SGS) – Jeddah, Saudi Arabia <i>Data Analyst (Tamheer)</i>	10/2025 – 12/2025
- Developed 15+ automated dashboards and reporting solutions using SAP and BI tools. - Generated 20+ executive reports from business and operational analysis. Collaborated with cross-functional teams to implement data-driven solutions.	
National Center of Meteorology (NCM) – Jeddah, Saudi Arabia <i>Data Engineer Intern</i>	06/2024 – 08/2024
- Automated hourly weather report processing using Python (Pandas, Regex), eliminating manual entry. - Developed ICAO message classification system for flight arrivals via time-series analysis. - Optimized SQL queries in DuckDB, improving database performance. - Implemented Docker containers and Git for environment consistency and version control.	

EDUCATION

Bachelor of Data Science <i>College of Computer Science and Engineering University of Jeddah</i>	08/2020 – 01/2025
GPA: 4.43/5.0 (Second Class Honors) Coursework: Machine Learning, Data Mining, Big Data Analytics, Database Systems, Cloud Computing, NLP.	

PROJECTS

Retrieval-Augmented Generation (RAG) Q&A System	05/2026 – 06/2026
- Built a full RAG system using LangChain, ChromaDB, and OpenAI embeddings. - Implemented document ingestion, chunking, and vector database storage for semantic retrieval. - Designed retrieval-augmented LLM responses with source-grounded answers. - Built an interactive chatbot using Gradio for real-time user interaction.	
AI Resume Optimization & Job Matching Assistant	03/2026 – 04/2026
- Built an AI system using OpenAI and Claude APIs for resume-job matching and optimization. - Implemented structured outputs using Pydantic for reliable LLM response parsing and reasoning workflows. - Developed automated pipelines for skill extraction, gap analysis, and job alignment. - Generated ATS-optimized resumes with improved structure, wording, and impact framing. - Built automated cover letter generation tailored to job descriptions, unified into an end-to-end pipeline (<code>run_resume_rocket</code>).	
Car Damage Analysis Pipeline Graduation Project	10/2024 – 01/2025
- Built YOLOv8 & EfficientNetB0 models: 81% detection, 93% severity, 100% part ID. - Processed 23,000+ images using OpenCV/Pandas, creating a high-quality dataset. - Designed rule-based cost estimator integrating all models’ outputs. - Developed unified platform combining detection, classification & part identification (21 parts). - Deployed Streamlit app generating automated PDF reports.	

PROFESSIONAL DEVELOPMENTS

Associate Data Analyst DataCamp	04/2025
Guided Learning Experience - Using Generative AI for Software Development 1Q 2025 IBM & Tuwaiq Camp	02/2025
Natural Language Processing Specialization DeepLearning.AI	02/2024
Google Advanced Data Analytics Specialization Google	02/2024
IBM Data Science Specialization IBM	05/2023

SKILLS

- AI:** Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, Prompt Engineering, RAG Systems.
- Data & Programming:** Python, SQL, Power BI, Excel, JavaScript, TypeScript, SQLite, ETL Pipelines, Docker, Git.
- Soft Skills:** Problem Solving, Analytical Thinking, Collaboration, Business Understanding, Time Management.
- Languages:** Arabic (Native), English.
